

Top 10 Reasons For Failing

- ★ Not making effective observations and poor judgement when emerging out of side roads
- ★ Incorrect use of the controls and/or poor observations when reverse parking
- ★ Not making effective use of the mirrors well before changing direction or slowing down
- ★ Poor use of the controls and/or weak observation when reversing round a corner
- ★ Incorrect use of signals either by not cancelling signals or by giving misleading ones
- ★ Failure to move away correctly from stationary positions, usually due to poor observation
- ★ Incorrect road position, usually on bends, and poor lane discipline on roundabouts
- ★ Poor steering control, such as when making left or right turns
- ★ Incorrect position when turning right such as in one-way streets
- ★ Hesitation causing delay, usually by not pulling out promptly at junctions
